GAMMA

lampada a sospensione, hanging lamp
serena confalonieri, 2018

Gamma è la terza lettera dell'alfabeto greco ed anche la terza stella più brillante in una costellazione.
Ed è, infatti, un alfabeto di tre elementi in alluminio che creano una gamma di sei so-spensioni modulari.
Le sfere di vetro acidato contengono l'anima luminosa e, combinandosi in modi diversi con gli elementi metallici, danno vita a soluzioni sempre nuove che richia-mano le forme delle costellazioni.

Gamma is the third letter of the Greek alphabet and also the third brightest star in a constellation.
And it is, in fact, an alphabet of three aluminium elements that create a range of six modular suspensions.
The frosted glass spheres contain the luminous soul which, combining in different ways with the metal elements, give life to ever new solutions that look like constellations.
