

M E A

'Line of light'

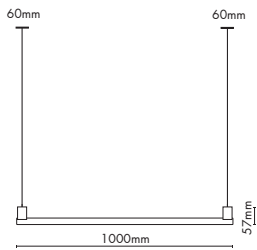

Designed by
Peter Straka
Vienna 2007

Light in its most minimal form: the linear lamp as an aesthetic object, anchored at both ends.
The optional back plate mirrors the reflection.

Process: The base material of the M E A range is brass. The brass is cut and polished. Then all the components are nickel plated and lastly assembled.

* Under unfavorable conditions these lamps can lead to acoustic noise. In case of resonance even low noise can cause audible effect. The installation as well as the dimmer or the transformer (harmonics or electronic resonance) are possible influencing factors.
