

POLAR

DESK LAMP

A circular motif is used throughout the Polar collection defining its minimal operative form. The Polar Desk Lamp utilises a unique magnetically attached arm to allow the disc to rotate around the body directing or shadowing light. A friction disc in combination with magnets molded into the ceramic body allows the arm to snap into place and function. Polar’s ceramic base is handcrafted using traditional slip casting and the surface is bisque fired and presented unglazed.

The face side of the disk is available in various colours with custom colours available on request.
