

EQUINOCIO LUMINAIRE

Design

FABRICIO RONCCA

Equinox is the moment when the Sun, in its apparent annual movement, crosses the celestial equator, making day and night equal in length. The idea was to create an innovative piece, with which the user can modulate and interact: the pendulum creates an unusual balance that contains directed lighting.

CARACTERÍSTICAS | REF 6822

External frame laminated with natural wood veneer
Internal frame with microtexture finish Illuminated
frame with frosted glass closure Illuminated frame with
upper handle for lighting adjustment Has 4 adjustable
stages with locking per stage LED lighting Lamp
activated by floor switch

Open product measure: 80 cm Image product finish: MA
(Width): - 13 3/8" (Depth): - 13 3/8" (Height): - 75
1/8"
