

Pebble

Pebble enables light to work in different ways, depending on the choice of material. Its shape encapsulates the light, which is distributed differently depending on whether the lamp is metal or glass. The glass version is mouth-blown, emitting an atmospheric, glimmering, broad blanket of light suitable for hotel lobbies or living rooms in the home, while the spun metal version's narrow spot is ideal for settings requiring more targeted distribution of light, such as bars or reception desks.

Specification

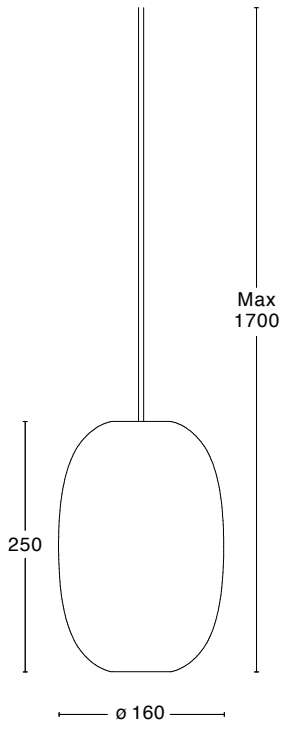

TECHNICAL SPECIFICATION

Design	Joel Karlsson
Electrical data	Class II IP20 230V
Description	Spun sheet, enamelled metal or hand-blown glass. Textile cord in warm grey or oxide red
Connection	Ceiling socket
Light source	Fixed 4W LED-module included (metal) 1,5W LED G9 included (glass)
Weight	3 kg
Volume	0,05 m ³
Care	Download Care Instructions
Recycling	Download Recycling Manual
