

## Lotus Vertical Bloom Large

REFERENCE CT3372/59

### DESCRIPTION

Inspired by an entangled blooming lotus, the design follows the inherent evolutionary disposition of an organism, proposing a spiral arrangement almost like a living sculpture of motion and growing light sources. The egg-shaped glass pieces emit light to involve the entire piece as a single organic silhouette, a Serip feature throughout all lighting designs, revealing an interesting glass work that includes bubbles in each piece - factor that confers unique characteristics to the light emission. Ideal for staircase areas and vertical architecture by its slick presentation.

### Designed and produced by hand in Portugal.

Serip reserves the right to make changes or improvements at any time it deems useful to guarantee the highest quality standards for its products.

### Hand-finished, some variations may occur.

All the glass models are designed by Serip and exclusively handmade produced, establishing a unique and prestigious feature of the glass handwork art. For this reason, there is the possibility of variation in measures, weight, colour and shape represented.
